ABOUT ME

I specialize in building full-stack applications using NextJS and Strapi CMS. I have a strong foundation in creating scalable, dynamic web applications, ensuring seamless user experiences and efficient back-end integration. Proficient in Node.js, Express, and PostgreSQL.

WORK EXPERIENCE

FRENCH4 DEV, Cracow

March 2023 - PRESENT

Front-end Developer

- Collaborated with an international French-English development team on various projects.
- Involved in the development and maintenance of web applications using modern front-end technologies.
- Connected existing NextJS applications to Strapi, ensuring smooth integration between front-end and back-end services.
- Customized Strapi CMS to meet specific project requirements, including creating custom content types, API endpoints, and implementing role-based access controls.
- Led projects from initial development through to production, including deployment and performance optimization.
- Worked on optimizing the performance and user experience of web applications.
- Developing APIs with Node.js, Express.js, and PostgreSQL.

TOB "Metakon", Kyiv

2018 - 2022

Deputy Head of Production

- Supervised production processes and coordinated the installation of metal structures in Kyiv's construction sector.

Projects

- Groupe TLM: A French manufacturer of high-quality flexible flooring solutions.
- Biomonde: A cooperative group of independent retailers specializing in organic products.
- CCS Imprim: A large-format printing company offering comprehensive printing services.
